

Water Resources

1 July 2020

Webinar

The latest Environment Bill puts a much greater emphasis on water abstraction and the need for monitoring the use of abstraction in comparison to abstraction licences has become much greater. In this workshop on Water Resources we are going to bring together stakeholders from the regulator, agriculture and the supply chain to understand the need for monitoring of water abstraction and understand the challenges that industry faces in order to have the right data and information in place.

Chair: Oliver Grievson, Z-Tech Control Systems and Matt Ellison, Wireless Innovation

13:00 Introduction by the Chairman.

13:10 Strategic look at monitoring and data in agriculture and water resources.
Matt Ellison, Wireless Innovation

13:35 Environmental Monitoring and data needs. **Paul Sadler & Sam Everitt, Environment Agency**

14:00 An agricultural perspective on Water Resources Monitoring. **Paul Hammett, NFU**

14:25 Addressing the monitoring needs of agricultural water abstraction. **Darren Meaning, Siemens**

14:50 Using data for compliance with abstraction licences. **James Dodds, Envireau Water**

15:15 A case study of managing water resource monitoring – Lowestoft Pipeline Project. **John Patrick, Sustainable Water Solutions**

15:40 Bringing the Water Resource Stakeholders together. **Trevor Bishop, Water Resource South East**

16:05 Discussion & close
