

## Sensor Sprint Interactive webinar

How can sensor technology help with the major challenges facing the water industry?

- Network flooding & water pollution
- Achieving net zero carbon emissions
- Leakage & per capita consumption (PCC)

Anglian Water, United Utilities, and Yorkshire Water will tell us where the gaps are in terms of what sensor technologies are needed. We will then hear more than 20 pitches about potential sensor technology solutions from leading technology companies and universities. On the panel helping evaluate pitches we have representatives from: Innovate UK, OFWAT Innovation Team and UKWIR.

---

**Chaired/facilitated by: Jonathan Abra (KTN), Andy Nichols (University of Sheffield) & Mike Strahand (Consultant)**

13:00 Introduction. **Andy Nichols, Mike Strahand & Jonathan Abra**

13:10 Network flooding & water pollution – what is needed? **Jacqueline Diaz-Nieto, Yorkshire Water**

13:25 Achieving net zero carbon emissions – what is needed? **Richard Bragg, United Utilities**

13:40 Leakage & per capita consumption (PCC) – what is needed? **James Hargrave, Anglian Water**

**13:55 More than 20 pitches from leading technology companies and universities!**

15:05 Breakout sessions to evaluate pitches and identify opportunities for collaboration and development of products and ideas – facilitated by KTN facilitators using Mural® software to capture ideas

15:35 Discussion of top ideas from each group for further development

**16:00 Close**
